VINIT KANT MISHRA

COMPUTER SCIENCE UNDERGRADUATE | SOFTWARE DEVELOPMENT • FULL-STACK • APPLIED AI

Kolkata, West Bengal, India | +91 8910512827 | mishravinit923@gmail.com

Portfolio | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience building web applications and AI-enabled prototypes using React, TypeScript, Python, APIs, databases, and cloud deployment. Project work includes a multilingual voice-based retrieval system, image-evidence verification, event discovery, disaster-risk decision support, and an e-waste recycling platform concept. Seeking a Software Development, Full-Stack, or Applied AI internship to contribute to useful product features, collaborate with engineers, and keep improving through real-world development.

TECHNICAL SKILLS

Programming	Python, C, JavaScript, TypeScript, SQL, HTML5, CSS3
Frontend & Backend	React, React Native, Vite, Tailwind CSS, FastAPI, Flask, REST APIs
Data & Applied AI	MySQL, Firebase, Supabase, Qdrant, Sentence Transformers, Retrieval-Augmented Generation (RAG)
Tools & Deployment	Git, GitHub, VS Code, Vercel, Render

PROJECTS

KAWA — E-Waste Collection & Recycling Platform
View project

Stack: React Native, Expo, TypeScript, Supabase, PostGIS
Designed a platform concept to connect informal scrap collectors with authorized e-waste recyclers, with location-aware workflows and traceability to support more responsible recycling.

RAKSHASETU — Multi-Hazard Risk & Relocation Support
View project

Stack: React, TypeScript, FastAPI, Python, Leaflet
Developed a GIS-oriented disaster-risk support concept for visualizing hazard red zones, assessing safer alternatives, and prioritizing vulnerable habitations for planned relocation.

NIGRANI — Image Evidence Discovery & Verification
View project

Stack: React, Node.js, SerpApi, SHA-256
Built an image-verification prototype combining reverse-image search, public-web evidence discovery, and cryptographic fingerprints for provenance checks and tamper-evident records.

BRAHMA — Multilingual Voice RAG
View project

Stack: React, FastAPI, Qdrant, Sentence Transformers, Sarvam AI
Created a voice-and-text question-answering pipeline that converts speech to text, retrieves relevant passages from a vector database, and produces answers grounded in retrieved content across multiple languages.

ENCORE — Concert & Festival Discovery
View project

Stack: React, Vite, Firebase, Ticketmaster API
Built an event-discovery experience for finding concerts and festivals, following artists, saving events to a calendar, and connecting with people attending the same show.

EDUCATION

Netaji Subhash Engineering College (NSEC), Kolkata — **2026–2028**
B.Tech — Computer Science & Engineering — Current institution

Calcutta Institute of Engineering and Management (CIEM), Kolkata — **2024–2026**
B.Tech — Computer Science & Engineering (first two years) — Previous institution
